Heritage Slate Roofing

*SYDNEY'S TRUSTED SLATE AND SHINGLE
EXPERTS*

About us

Heritage Slate Roofing, based in Sydney, Australia, was founded by Kyle Glasby and Luke Godden, who have over 20 years of combined experience in traditional slate roofing.

We started on a joint venture with extensive experience in Australia, Wales and England. We only use licensed tradesmen and will always have at least one director working on-site at all times.

Renowned for our great attention for detail, we have worked on some of the biggest slate jobs in New South Wales, Victoria, England and Wales.

Heritage Slate Roofing is now owned & ran by Kyle Glasby the director of the company.

Our Services

We offer a range of services, which include:

- All aspects of traditional roofing — heritage, residential, commercial jobs undertaken.
- All facets of lead work including chimneys, flashings, ridging and valleys.
- All Valley and hip replacements. Installation of copper, zinc or colourbond guttering and downpipes, mitred hips, valleys and ridging
- Random width slating and diminishing courses (for more rare slate variants or stone slate projects)
- Re-bedding and pointing of terracotta ridges and hips
- All Cedar Shingles and shakes
- All hardwood shingles and shakes

Membership

"The end result is spectacular, a talking point in our neighbourhood and has made our family immensely proud."

Tania Grippi - Woolwich Project

Welsh Penrhyn Slate

Welsh Slate, The best and most popular in the world. Comes with a 100 year warranty direct from the quarry and with a 20 year workmanship guarantee from Heritage Slate Roofing. Heather Blue in colour makes this one of the most desirable slates on the market.

Operating from its quarries in North Wales, Welsh Slate has been supplying the world with high-quality slate for hundreds of years. Penrhyn Quarry has been producing roofing slate since the thirteenth-century.

Penrhyn Quarry has been at the centre and the focal point for UK natural stone and its heritage for 700 years and a major operation for over 400 years.

Evidence of shipping of materials dates back to the fourteenth-century and by the eighteenth-century Welsh slate was being shipped to all the major UK ports as well as many western European destinations.

Canadian Glendyne Slate

Glendyne is middle of the range in terms of cost and comes with a 75 year warranty direct from the quarry and 20 year workmanship warranty from Heritage Slate Roofing. Its blue/grey in colour and sits very well when laid correctly.

Glendyne slate is produced in the town of Saint Marc du Lac Long, Quebec, Canada. This blue/grey slate is available exclusively from Cembrit Blunn Ltd.

Glendyne slate has a fast growing reputation for quality due to the exceptional slate deposit and the combination of modern extraction technology with traditional finishing skills.

Glendyne slate will withstand the most severe weather conditions: it is unaffected by sunlight, ultraviolet light and even acid rain.

Spanish Del Carmen Slate

Spanish slate comes in a blue/black colour and is at the lower end of the scale in terms of cost, but does not compromise on quality. It come with a 100 year warranty direct from the quarry and a 20 workmanship warranty from Heritage Slate Roofing.

Imbued with natural colour and character as well as strength, Spanish slate is the roofing material of choice. It adds warmth, elegance and beauty to any architectural style – domestic or commercial, traditional finish or modern twist. It is fireproof, waterproof and resistant to extreme temperatures and climatic conditions.

Preferred by builders and architects for its exciting and aesthetic results, slate also offers true individuality.

SVK Artificial Slate

Artificial fibre cement slate fit to the shape of any roof and come with a 10 year colour warranty and 20 year structure warranty direct from the supplier.

All workmanship comes with a 20 year warranty on new roofs. SVK's artificial slates are always a reliable and stylish option. The quality of these fibre cement slates is exceptional. They have a brilliant finish, whether you opt for a smooth or textured surface.

Furthermore, all slates are durable.

They are provided with an environmentally friendly coating (based on a water-based acrylic resin) with moss-resistant qualities. They are dimensionally consistent, easy to handle and have a low susceptibility to breakage. In short, it is high quality and timeless roofing.

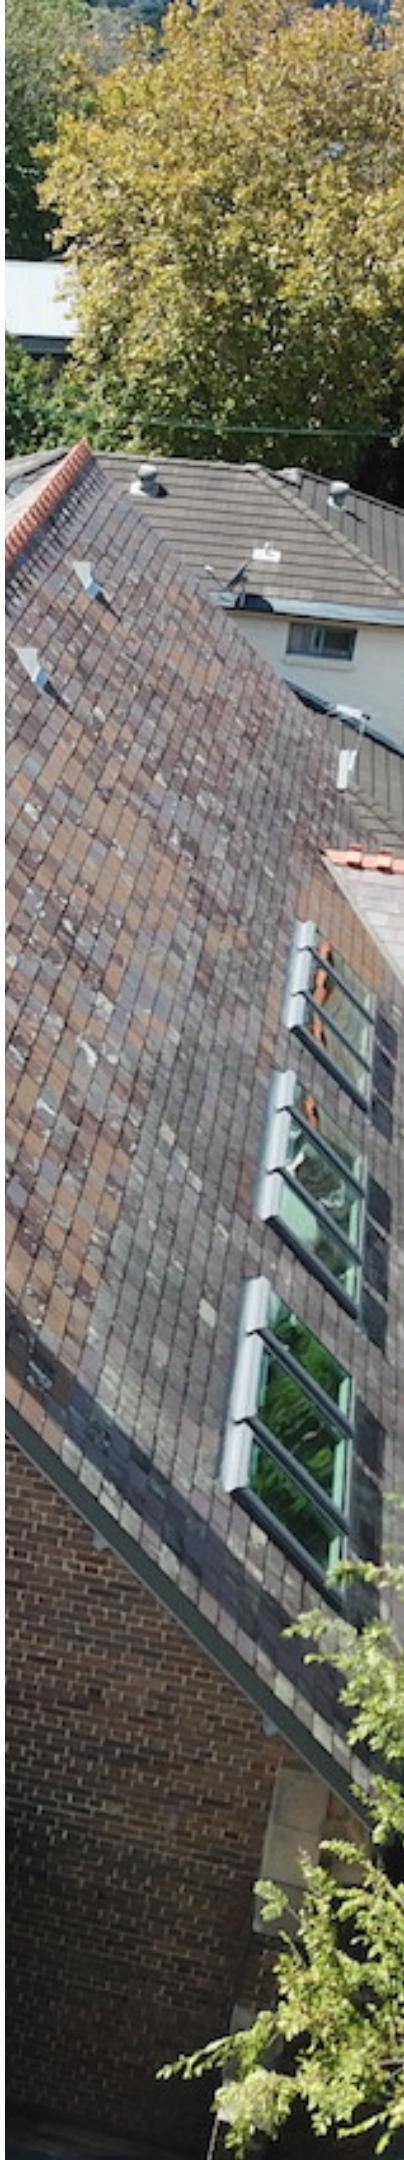

Reclaimed Slate

There are two significant benefits to using reclaimed slate when considering to re-roof your home. The first is that visually, it often looks better, especially on older Heritage style properties for example where new slate will not enhance the age of the building.

To add to that, it is a formidable form of recycling which is very important as it stops materials ending up as landfill. Reclaimed slate can often work out cheaper than new slate, and if they are of good quality they should last up to 100 years.

Reclaimed slate will have to be salvaged and saved from another roof. Whilst they are technically second hand they are usually of high quality and have an excellent life span if laid & installed correctly.

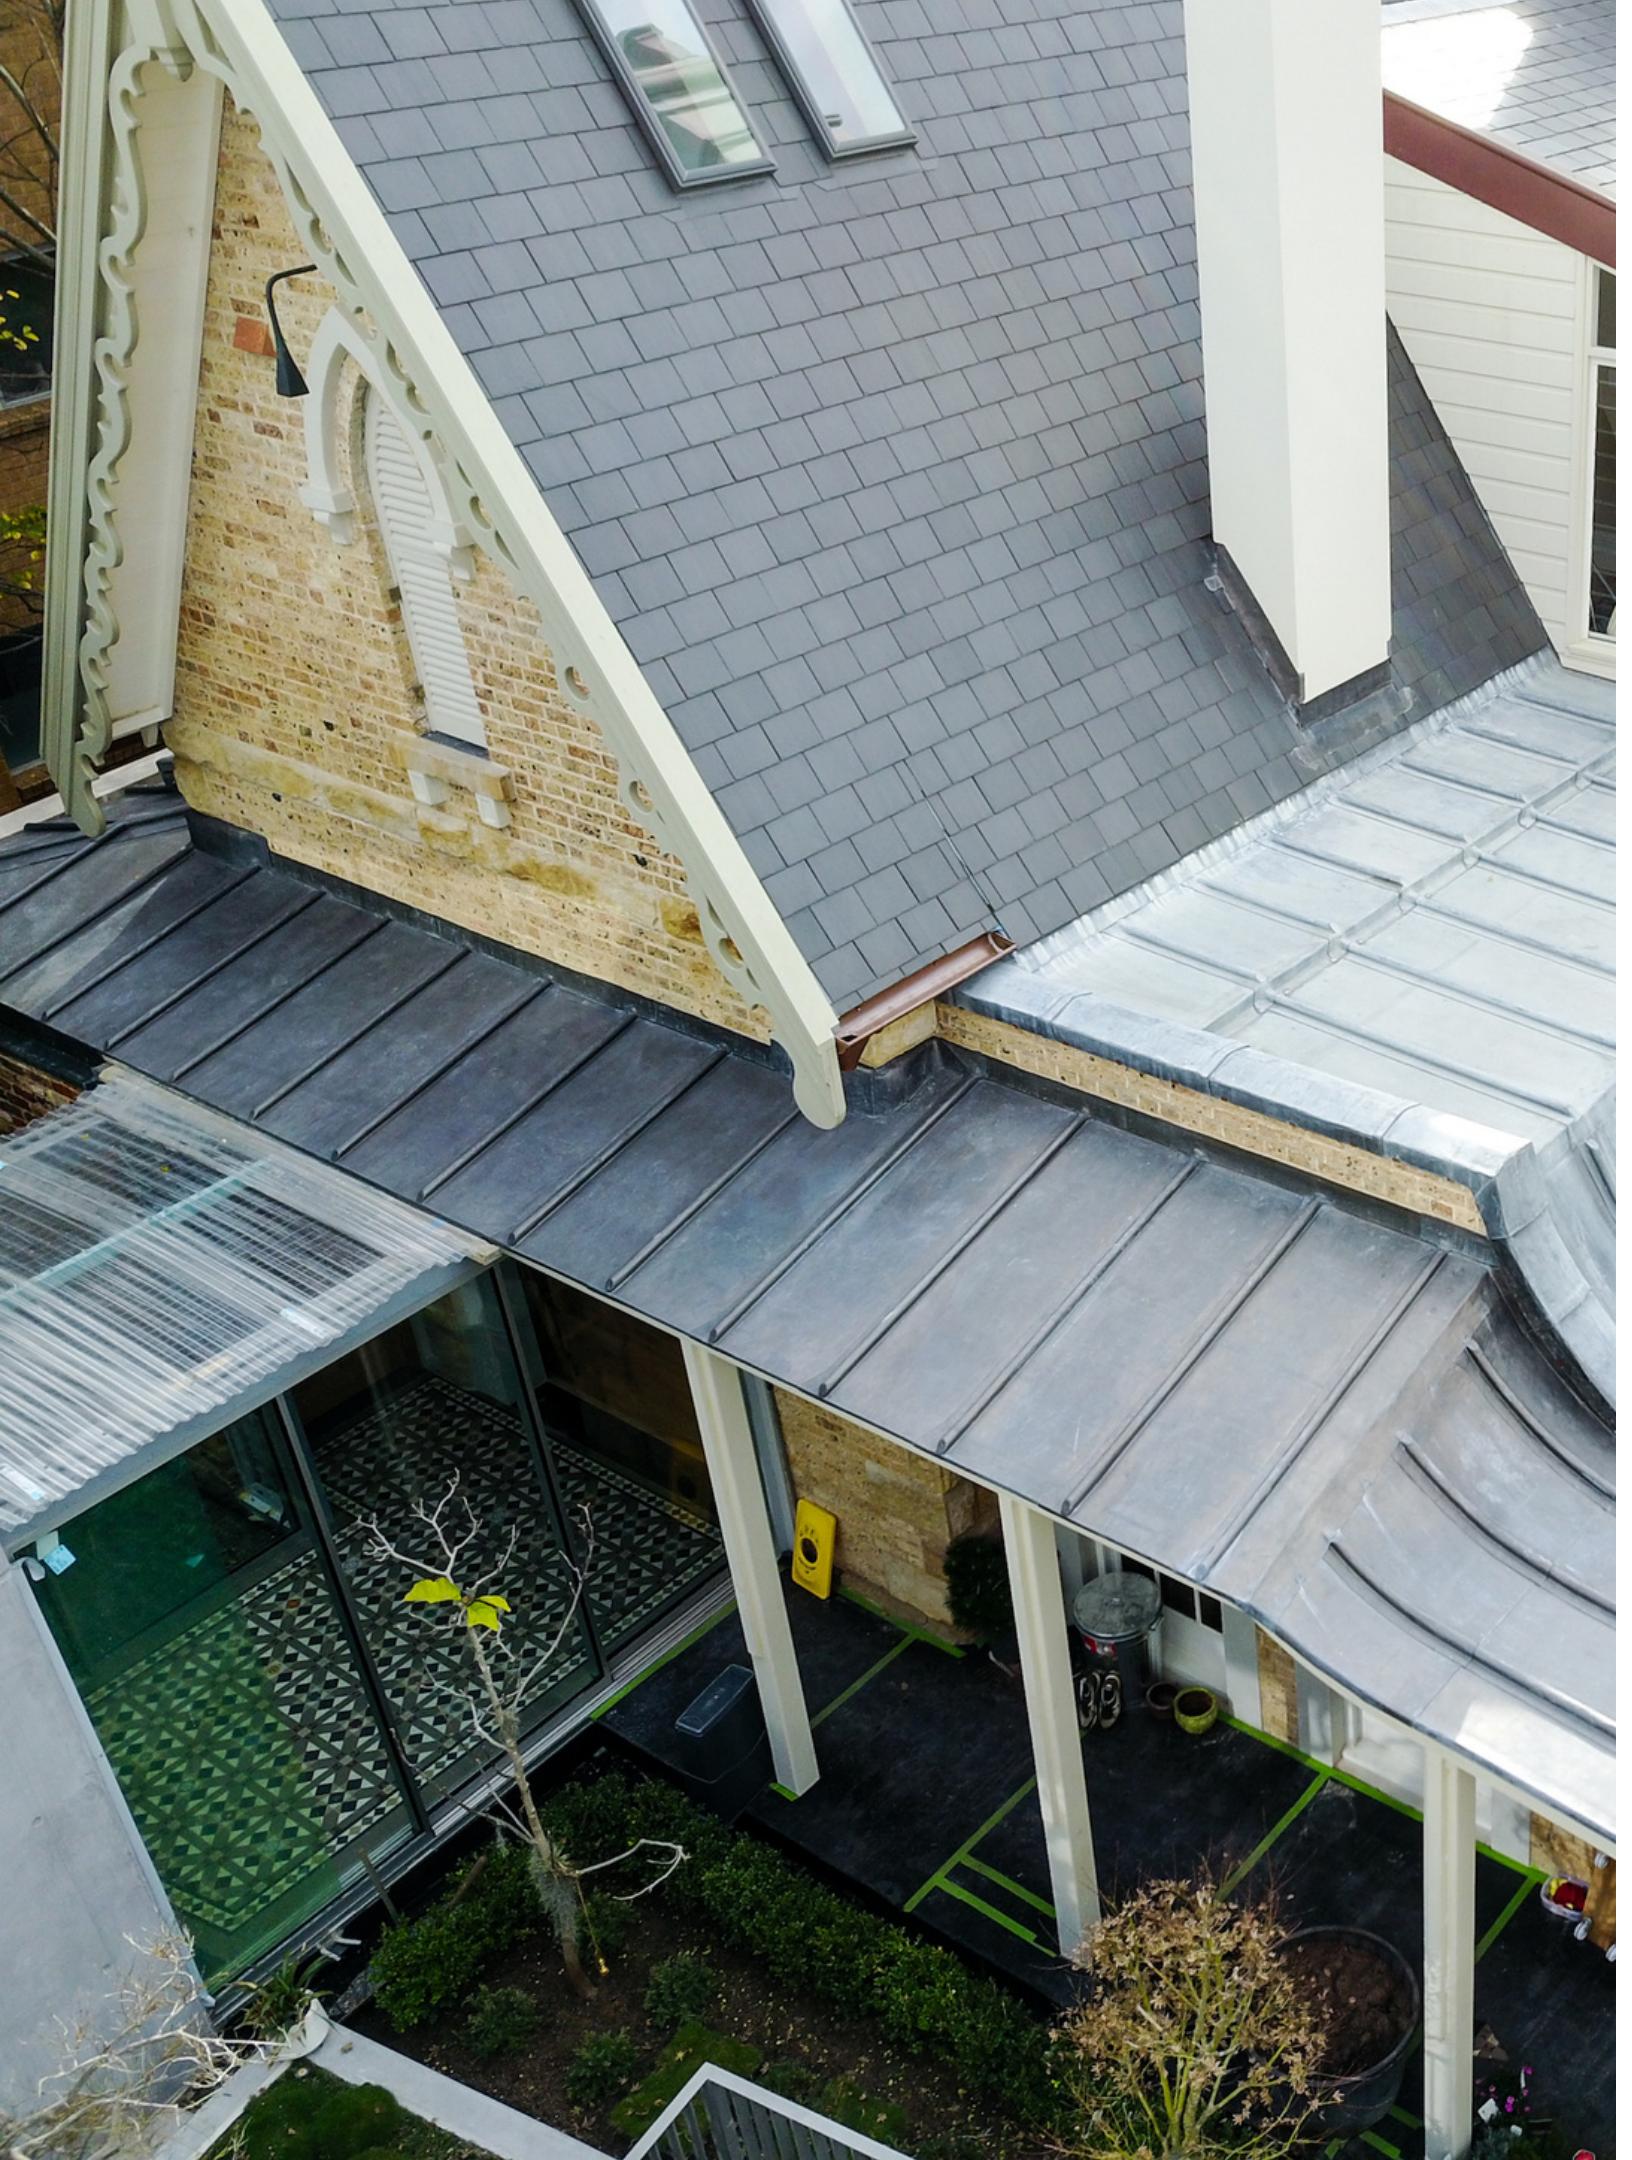

Copper Roofing

Copper is a material mostly renowned for its brilliant durability. There has been no other materials like copper that has enhanced buildings all over the world for so long and adapted so well to the architectural variances and styles over time.

Copper has excellent corrosion resistance & is considered favourably as a pro-environmental material in the building industry. Copper has the ability to be 100% recycled, this has allowed the majority of copper ever mined to stay in constant circulation.

When copper is freshly installed it presents a natural bright finish but over the course of a few months this finish will mellow to a smooth deep bronze colour before finally developing a completely unique verdigris patina. Copper is one of those freakish materials on this planet that the older it gets the better it looks.

Lead Roofing

The team have a combined lead roofing experience of over 20 years passed from generation to generation of family members.

We're so confident in our lead work it comes with a written 30-year warranty. We offer a cost effective, long lasting lead roofing solutions including, new lead roofs, lead flashings, lead box gutters, lead roll top ridge and all other aspects at competitive rates.

Lead roofs and flashing have added prestige to buildings for centuries and still add a touch of first class roofing that no modern material can.

Why choose Lead as a roofing product?

Cost effective: Lead is more cost effective over a long period than any other man-made material, Longevity: Lead has proven to last over 100 years. No man-made product comes close to this life-span & did i mention it's Environmentally friendly

Zinc Standing Seam

Zinc has in recent times become increasingly popular as it offers a wide variety of facade and roofing techniques using a vast range of surface colours.

Today's Zinc is eco-friendly being 100% recyclable and is self protecting due to naturally forming patina requiring minimal to no maintenance.

The coating "patina" which forms over an amount of time gives the roof a significant life span for upto 40 years. Zinc should be considered for roofing and facade cladding as it is durable, flexible and can be applied to almost any design and shape making it a perfect choice for bespoke architects.

Another benefit of Zinc is that it can be laid on pitches ranging from 3 degrees to vertical. It holds a strong property with it's ability to blend well with other building materials.

Asphalt Shingles

Asphalt Shingles are becoming more and more popular in Australia and Heritage Slate Roofing are one of Sydney's leading installation Companies.

The shingles are made to imitate natural products and closely resemble the natural beauty of slate or wooden or shakes.

A shingle roof is long-lasting with pricing that will suit most roofing or wall cladding applications. To see the full range of Asphalt products feel free to send an email so we can forward on the brochure.

Cedar Shingles

The warmth and beauty of a natural cedar shingles goes beyond enhancing the appearance of your home.

It reflects pride of ownership and, most importantly, it shows an intelligent sense of value. No matter where you live, or how harsh the climate, a cedar shake roof will be as durable as it is beautiful.

Cedar's natural versatility makes it ideal for your home. Heritage slate roofing only use the top grade Cedar shingles directly from North America.

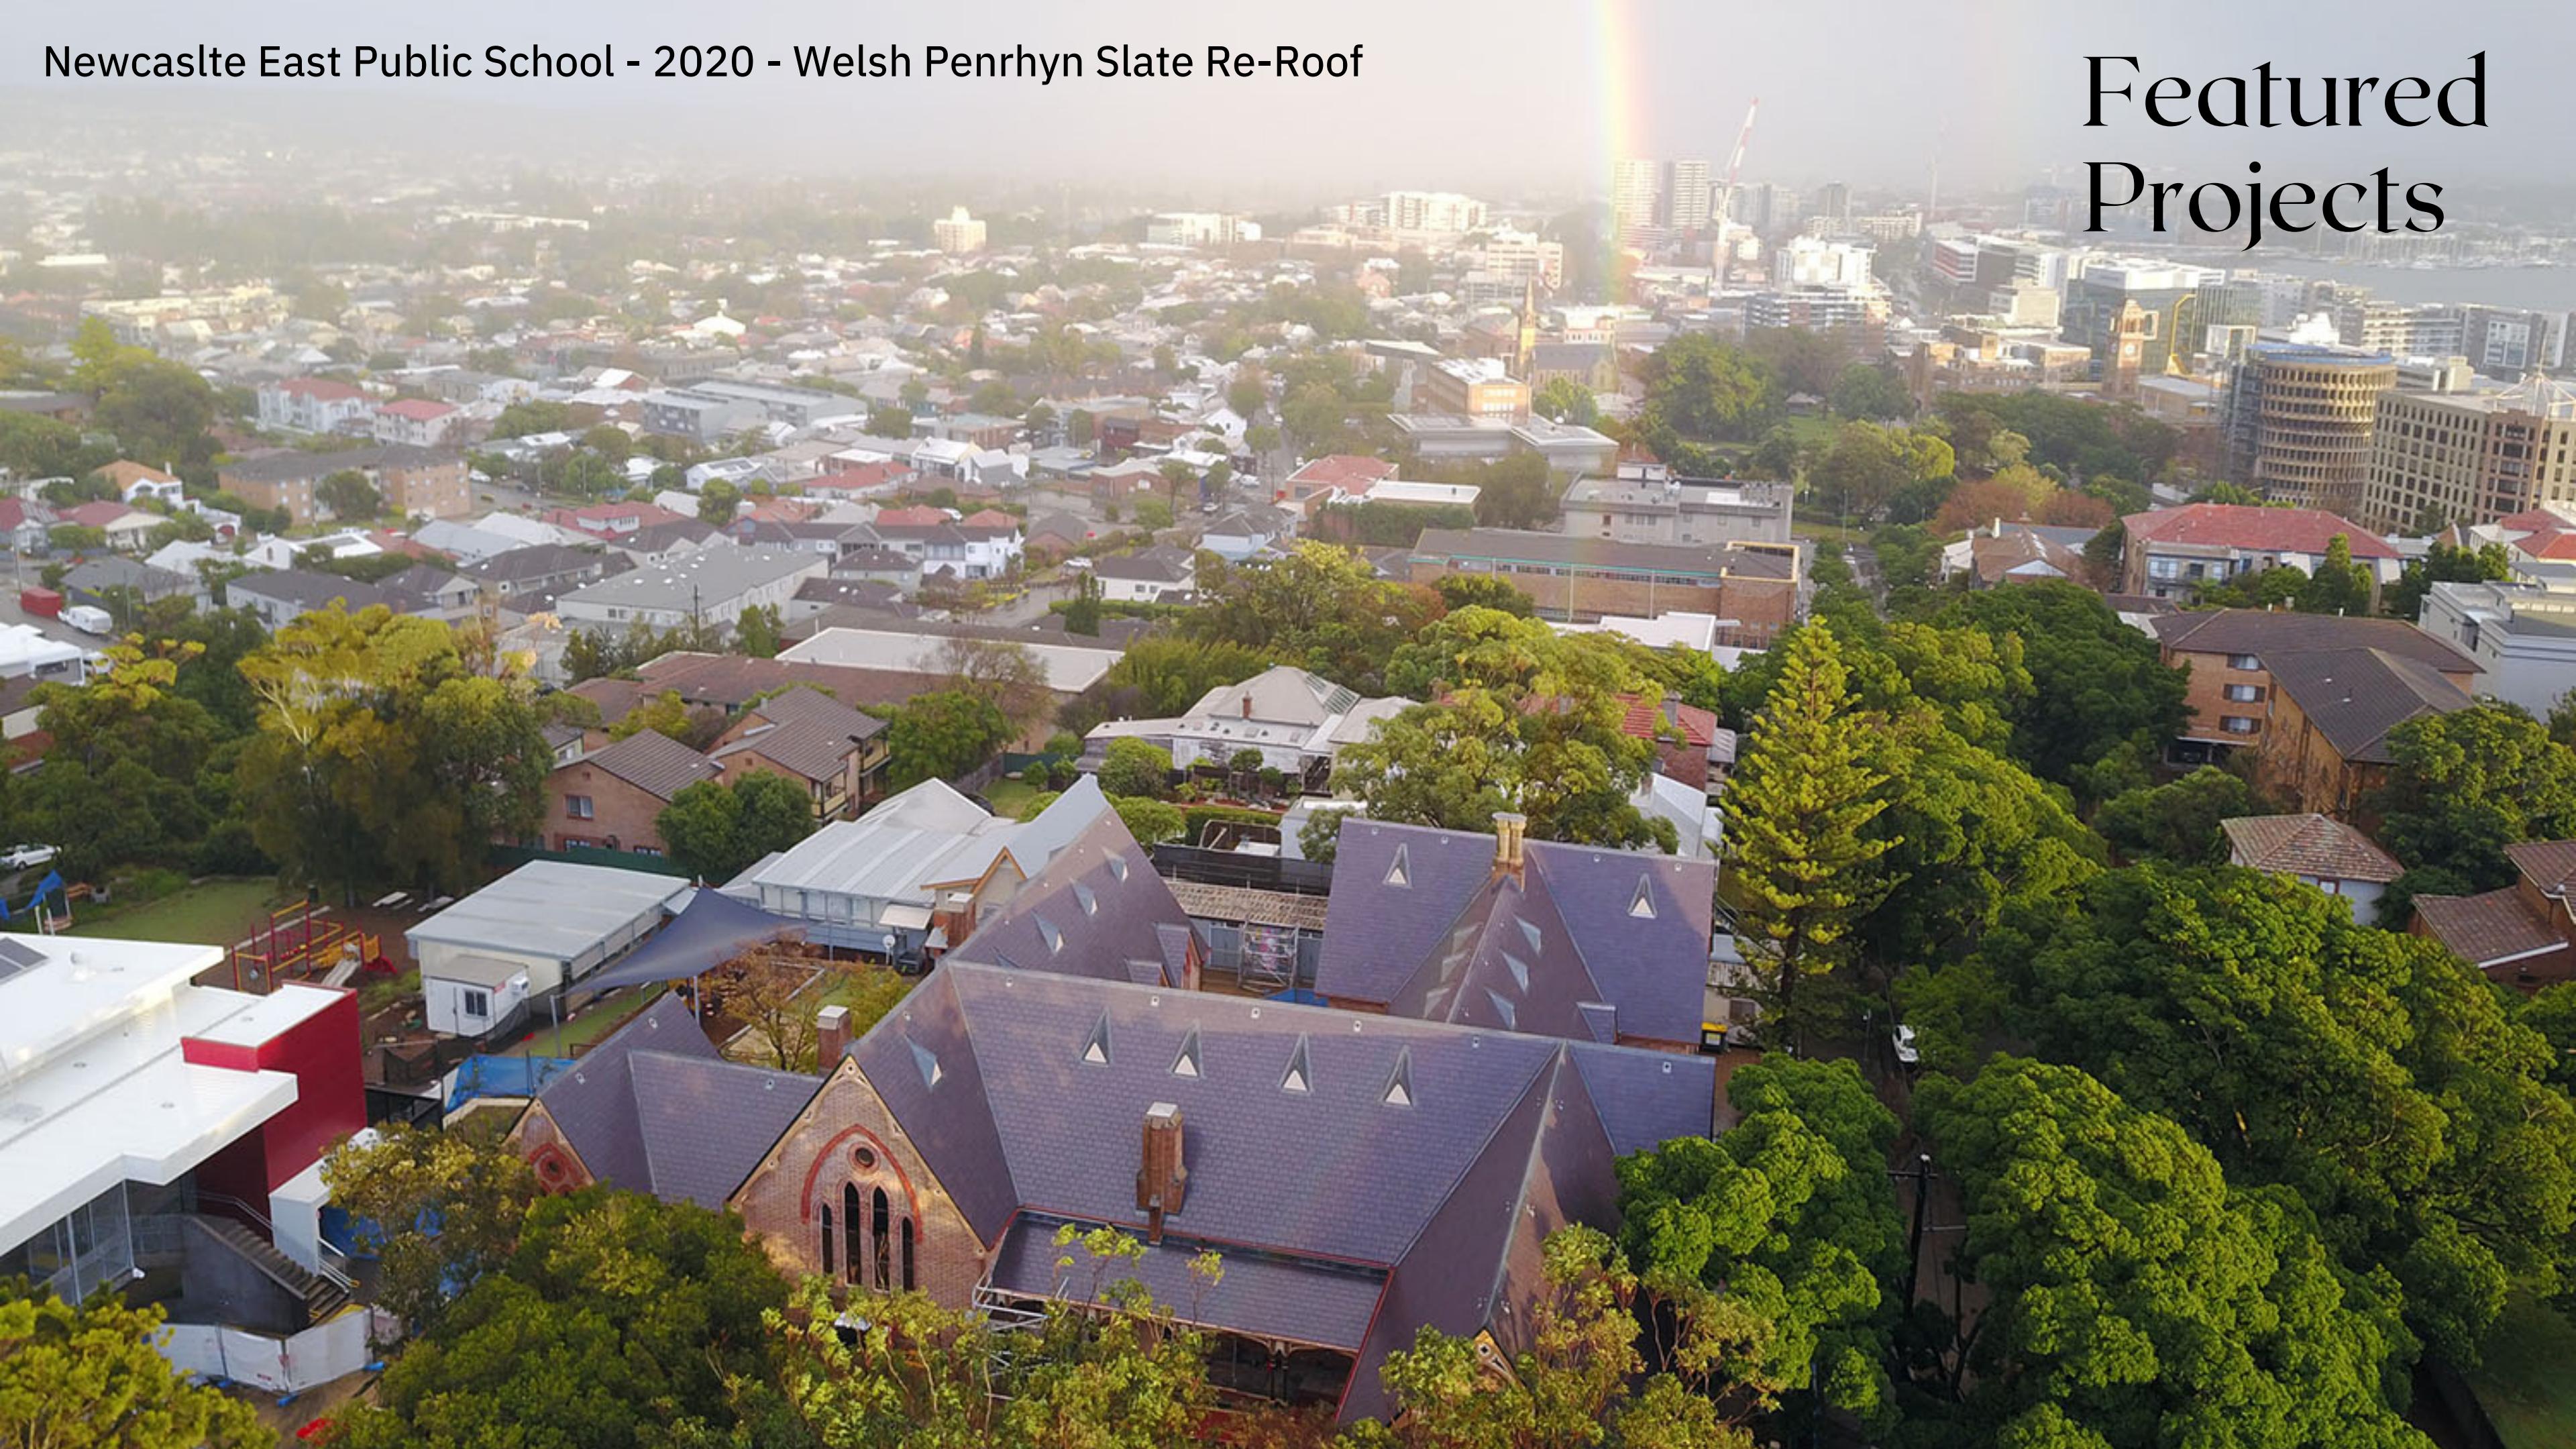

Terracotta Shingles

The elegant flat line of these quality Terracotta Shingle tiles makes them the perfect complement to a wide range of architectural styles, building materials and house environments.

Featuring a low 18 degree pitch, (with sarking) this flat profile was designed to provide the greater design flexibility that contemporary rooflines demand.
